

CORPORATEAV 
INTEGRATION

the installation company

● Corporate AV Integration - driving excellence in Africa's corporate audiovisual market

Corporate AV Integration was founded in 2011 to provide corporate audiovisual (AV) and radio frequency (RF) solutions that help our clients maximise their return on investment in these complex and potentially expensive technologies.

Our vision is to become Africa's leading provider, implementer and integrator of corporate AV solutions.

Our mission is to elevate professional standards in the corporate AV market by providing qualified skills and leading products that help our clients to derive the maximum benefit from their AV solutions.

● Our industry credentials

The South African corporate AV market has traditionally operated outside international standards.

Our aim is to lead the professionalisation of this market and raise standards by aligning ourselves closely with the best practices of the South African Communications Industry Association (<http://www.sacia.org.za/>) and Infocomm (www.infocomm.org).

InfoComm is the trade association representing the professional audiovisual and information communications industries worldwide. Corporate AV Integration is a founding member of the Southern African Communications Industries Association (SACIA) - a trade association that promotes adoption of professional standards and ethical business practice in the communications industry. SAICA has partnered with InfoComm to improve AV training and service standards in Southern Africa.

Members of our team have done InfoComm Certified Technology Specialist (CTS) training, Infocomm AV/IT Integration training and Infocomm AV Essentials training showing that they have demonstrable audiovisual knowledge and skills. They also hold technical certifications from our

vendor partners such as Kramer Electronics, Smart Technology, Polycom University, Biamp, Comptia A+ and N+ Certification, Crestron Essentials etc.

● What we do

Corporate AV Integration supplies, designs, deploys and integrates tailored AV solutions for environments such as boardrooms, hotels, factories and retail stores.

We also help IT departments to integrate these solutions into your IT environment. Our service level agreements will give you peace of mind.

We service both the enterprise and small and medium enterprise market with tailor-made solutions to accommodate budgets and requirements.

Our solutions include:

- Video and audio conferencing
- Digital signage solutions
- Smart boards and interactive whiteboards
- Boardroom automation and solutions
- Background music systems
- Audio evacuation systems
- Maintenance and repair of AV equipment
- CCTV Systems, IP and COAX
- Backbones for multi dwelling units (Satellite TV)

We have access to solutions from leading AV vendors such as Creston, Harman, Kramer, Polycom, Alcad, AMX, Bose, JBL, Lifesize, Parrot, Panasonic, Spaun, ProConnect, and InterM to name a few.

Our philosophy is to share knowledge with our clients to empower you with the information you need to reach your goals.

● Our customer-centric approach

We put our customers at the centre of our business, so we will work with you to create a customised solution that meets your business needs and budget. Because we constantly invest in training our technical and sales professionals in the latest technologies, we can keep you abreast with the newest solutions in this fast-changing field.

Our philosophy is to share knowledge with our clients to empower you with the information you need to reach your goals. We are meticulous and passionate in the way we tackle every project, aiming to deliver as much business value as possible in every installation we complete.

“ A high quality and effective outfit that have only delivered outstanding service, sometimes in the harshest environments. They are our partner of choice and I for one am happy to recommend them to any of our clients or colleagues. ”

MILES PARR, Owner of Thor Project and Design Consultants

“ Corporate AV Integration has a can-do attitude, making them a pleasure to work with. Their staff are well mannered and knowledgeable. They have an excellent technical proficiency offering a broad spectrum of AV related expertise. From a building wide TV system to a home theatre system, they can do it all. ”

VASILIO KOURELOS, Director, The Maboneng Precinct

“ We use Corporate AV Integration for most of our Johannesburg installations because of the teams’ professional approach and quality workmanship. They have a very good understanding of solution design and implementation of these designs to meet our client’s expectations. Their experience in the field of audio visual and video conferencing integration makes them a pleasure to deal with – first time right, every time. ”

ANDRE VAN HEERDEN, Business Unit Manager - Multimedia Solutions, First Technology Group

“ Corporate AV Integration is a professional company with attention to detail, all installations to date have been done flawlessly and professionally. I highly recommend them to any company looking to get AV work done. ”

PEDRO DAVID, It Services Manager, Famous Brands

“ It was a pleasure working with the Corporate AV Integration team on the Samsung project – they are very knowledgeable, efficient and passionate about delivering great service and good quality products. ”

VANESSA KRAMER, Infinitude Design

“ I can highly recommend Corporate AV integration. They are courteous, professional and easy to work with, and consistently supply top-quality service and products. As a supplier, they are reliable and can be counted on to keep their word. ”

CARLO MAUCIONE, Senior Information Technology Specialist, Institute for Security Studies, Pretoria
